

# Project Status Report - 10/14/19

Northrop Grumman

## Project Status Summary

Percent Completion: 1%

Scope	Schedule	Cost	Risks	Quality
-------	----------	------	-------	---------

We are currently on schedule. We have completed the Project Charter and sent it to our sponsor for approval. We will be able to turn it in as soon as we receive it back from them.

### Work Planned for Last Week

Last week, we planned to complete the project charter and submit it to our sponsors and Professor Paradise. If time allows, we thought we might start looking over what last year's team did and decide what technologies we plan to use this year.

### Work Completed Last Week

We finalized the project charter and discussed the schedule and a lot of logistics for the execution of our project. We designated roles to each team member as well. Also, we have begun reviewing the teams work from the previous year and looking into the type of data and methodology they were using. We also decided with the sponsors to use the machine that they will be providing for us to do our computing instead of using cloud computing. Also, we have been doing research into algorithms which we plan to implement as well as other datasets we might be able to use.

### Work Planned for Next Week

We will spend most of our time this week making and practicing our presentation, and will spend some more time discussing the datasets and algorithms we have been researching independently as a group. We will also begin to work on making our requirements document. We plan to schedule a meeting with our sponsor for some time in October as well.

### Deliverables and Milestones

Milestone/Deliverable	Planned	Forecasted	Actual	Status
Presentation	10-15-19	10-15-19	in-progress	On schedule
