

Project Status Report - 10/6/2019

Northrop Grumman

Project Status Summary

Percent Completion: 0%

Scope	Schedule	Cost	Risks	Quality
-------	----------	------	-------	---------

Our project is currently slightly behind schedule. We met with our sponsors relatively late, on September 25th, so we haven't been able to complete our project charter yet. We are currently working on it, and it should be done by the end of next week. We have a fairly good understanding of the project's requirements, so there are currently no other problems.

Work Planned for Last Week

Last week, we planned to set up communication between the team, sponsors, and TA, as well as complete most of the project charter.

Work Completed Last Week

We set up communication between the team, sponsors, and TA, as well as a recurring meeting time with the TA. We also had our second meeting and laid out how we wanted to do the project charter, but we didn't complete as much as we had hoped.

Work Planned for Next Week

Next week, we plan to complete the project charter and submit it to our sponsors and Professor Paradise. If time allows, we may start looking over what last year's team did and decide what technologies we plan to use this year.

Open Issues

The only current issue is the project charter, which is slightly behind schedule.

Deliverables and Milestones

Milestone/Deliverable	Planned	Forecasted	Actual	Status
Project Charter	10/14/19	10/14/19	In Progress	Behind Schedule
