Project Status Report - 10/21/19
Northrop Grumman

Project Status Summary   Percent Completion: 3%

Scope	Schedule	Cost	Risks	Quality

We are on schedule with our project and just completed two major milestones this week. We submitted the Charter on October 15th and uploaded it to Github. We also presented our project on Wednesday October 16th to the class.

Work Planned for Last Week

Last week, we were waiting for our sponsors to get back to us with the signed Charter so we could submit it on our end. We also knew we had to present our project on Wednesday so we allocated a few hours to work on creating the presentation and determine logistics in terms of presentation.

Work Completed Last Week

We accomplished everything we set out to do this week. We received the signed charter from our sponsor on Tuesday, allowing us to upload it to Github and share it with Mr.Paradise. On Monday we met with our TA and gave him updates on our project as well as shared with him what we planned to present to the class regarding our project. We then spent the next few days leading up to the presentation refining the slides and determining which person was going to cover which slides. We also continued doing preliminary research regarding data sets and algorithms we plan to use.

Work Planned for Next Week

Next week we are planning to dedicate our time to work on the requirements document. We are also planning to have a meeting later this week with our sponsor where we can give him a clear scope of the project. We also want to clarify aspects of the project that we believe are still somewhat unclear during the meeting. Later this week we are picking up the computer that Northrop Grumman has provided us to train the models with, so we will also spend some time setting up the workspace.

Deliverables and Milestones

Milestone/Deliverable	Planned	Forecasted	Actual	Status
Requirements doc	10-31-19	10-31-19	In progress	On schedule
